

## Moto Health Care Custom Specialist Acute Medicine Formulary 2026

Reference pricing is applied. If a product is dispensed that is more expensive than the reference price, the patient will need to pay the difference in price at the point of dispensing.

Quantity limits apply to some items on this formulary. Quantities in excess of this limit will need to be funded by the member at the point of dispensing, unless an authorisation has been obtained for a greater quantity.

The examples below serve as a guide to the prescriber. Listed products will be reimbursed in full if the price falls within the reference price range for that group. Other generic products not specifically listed will be reimbursed in full if the price falls within the reference price range for that group.

The formulary is subject to regular review. The formulary may be changed and updated when new information becomes available, prices change or when new medicines are released.

While every effort has been made to ensure that products listed are available on the market, it is possible that some products may be discontinued by the manufacturers during the course of the year.

Therapeutic Class	Nappi	Product Name	Quantity allowed
ANALGESICS	792101	ACTAMOL 120MG/5ML SYRP	200
